

Ng Tai Rong
St. Andrew's Primary School

Subjects enrolled in SmartLab:

- A* for Science
- A for Maths

Tai Rong is an inquisitive student in class and would not hesitate to raise any doubts with the lesson. Teaching him is a pleasure as he is able to grasp concepts taught quickly.

SmartLab: How have you guided Tai Rong in his preparation for his PSLE examinations?

Mr. Ng: I have to push him at times as students have to put in effort in order to do well.

SmartLab: Is there any other advice you'd like to offer to fellow parents?

Mr. Ng: Spend more time with the children. Can't just place them in tuition centres and expect everything will be alright. Family support is very important as we need to give them relief and not pressurise them.

SmartLab: Thank you very much for your time. I would like to speak to Tai Rong.

Mr. Ng: You are welcome.

SmartLab: Congratulations on your achievements. Tai Rong, which school are you studying now?

TR: St. Andrew's Secondary School, which was the school of my choice.

SmartLab: Any good advice for SmartLab students sitting for their coming PSLE examination later this year?

TR: Work harder and students should not assume that PSLE is going to be easy.

SmartLab: In what other areas do you believe has SmartLab helped you?

TR: Mr. Tan and Ms. Ng were my teachers in Maths and Science. They were good in the way they taught me as I could understand very well.

SmartLab: Tai Rong, thank you for your time and all the best to you!

TR: Thank you.

Subjects enrolled in SmartLab:

- A* for Science
- A for Maths
- For his resilience as he scored 50s in Math and Science for his preliminary examination. He was originally quite disturbed over these results. Hence, a great comeback for his PSLE results.

Ryan Ng
Maris Stella Primary
School

SmartLab: Congratulations on your son's achievements.

Are you happy with his results?

Mrs. Ng: Quite happy.

SmartLab: How have you guided Ryan in his preparation for his PSLE examinations?

Mrs. Ng: Not very much as I relied on SmartLab to prepare him for his PSLE. The father would help him a little at times.

SmartLab: Is there any other advice you'd like to offer to fellow parents?

Mrs. Ng: One important element is not to pressurise students. Emotional support and having the faith that your child can do it are crucial for the intellectual development of the child.

On a different note, I would like to add that SmartLab had instilled confidence in him especially after the results of his preliminary exams. That was a great relief to us, as we were originally quite concerned over his eventual performance for his PSLE.

SmartLab: Thank you very much for your time. I would like to speak to Ryan please.

Mrs. Ng: You are welcome.

SmartLab: Ryan, which school are you studying now?

RN: Maris Stella High.

SmartLab: Please describe your feelings as you received your PSLE results.

RN: I was happy but would have been happier if I had a higher grade for Mandarin.

SmartLab: Please share your secrets of your success with us!

RN: I relied on SmartLab notes, i-science textbook and some preliminary papers before the PSLE.

SmartLab: Any good advice for SmartLab students sitting for their coming PSLE examination later this year?

RN: Study harder for Mandarin. It's not easy. More exposure to different types of questions would be good as well.

SmartLab: In what other areas do you believe has SmartLab helped you?

RN: Notes were very useful. The homework provided a variety of questions that focused on topics taught by school and overall, the materials helped me to understand the topics.

SmartLab: Ryan, thank you for your time and all the best to you!

RN: You are welcome.
